

NEW SHOWROOM BUILD OUT | Case Study

THE OWNER

A unique showroom enabling customers to order custom made garments online or in-person.

THE LOCATION

Midtown Manhattan

THE SPACE

1,712 square feet, multi-level retail space.

THE SCOPE

Four week interior retail build out. Consisted of electrical, carpentry, lighting, HVAC, painting and all finishes.

THE DETAILS

Installed the electrical and lighting including track lighting around perimeter of store, fitting rooms and specialty theater lighting. Full installation of fitting rooms and display walls, in addition to painting all walls and ceiling using client paint specifications. Trenching and waterline installation for water cooler and mop sink. Installed all HVAC and duct work. All work done to meet deadlines with schedule adjustment due to street closures during UN week.
