

CASE STUDY: RENOVATION

THE OWNER

A high-end clothing retailer.

THE LOCATION

CF Eaton Centre in downtown Toronto

THE SPACE

10,129 square foot, multi-level retail space.

THE SCOPE

Full renovation of existing store including new wood flooring, millwork upgrade, electrical & refreshment of existing fitting rooms.

THE DETAILS

Utilized partial closure technique to ensure store remained open for the duration of the project. Non-structural walls were removed in order to create an open concept. Full floor installation took place which included a self-leveling pour through the retail space. Millwork upgrades consisted of refinishing existing built-in wall bays, installation of new cashwrap, new sales area transom, fixture installation and replacement of wall base. Storefront refinishing was completed along with painting of the space and pendant and track lighting installation.
